EDUCATION

McGill University

May 2026

Bachelor of Arts, Computer Science

- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Compiler Design, Database Systems, Natural Language Processing & Language Models

PROFESSIONAL EXPERIENCE

Cuerank

Apr 2025 - Aug 2025

Back-End Software Engineer Intern

Remote

- * Built a Flask-based REST API that powers WHR-based player rankings, supporting an initial market of 300K professional players and growth toward a 2M+ user base.
- Engineered an event system with WebSockets and Redis/Valkey queues to broadcast real-time data to distributed users, achieving fast data delivery across the platform
- Optimized system throughput and responsiveness by implementing a Celery-based asynchronous pipeline to offload non-critical background tasks.
- Deployed Role-Based Access Control and JWT authentication, strengthening data integrity and preventing unauthorized access

An Khang Consultant Management and Design Company

Jun 2023 - Jan 2024

Technical Operations & Product Lead

Ho Chi Minh, Vietnam

- Engineered a Python automation script for SKU tracking and supply chain logistics, reducing manual processing.
- Formulated a strategic investment thesis for silver assets by identifying supply-chain constraints and rising industrial demand; generated \$100k in operational profit within 6 months while achieving a 4x valuation increase on underlying holdings.
- Leveraged existing engineering infrastructure to scale the artisanal division, building a strategic supplier network through technical consultations and market outreach, which expanded the supplier base and increased production capacity

PROJECTS

Vroom [Link to Project](#)

- Built and deployed a full-stack peer-to-peer car rental application using React, TypeScript, FastAPI, PostgreSQL, REST APIs, AWS S3, Stripe, and Socket.IO.
- Developed complete booking and payment workflows, host approval and instant booking, trip inspection uploads, and automated unit and integration tests using Pytest, Vitest, and GitHub Actions CI.

Mini-C Compiler [Link to Project](#)

- Mini C compiler in Java with class support: recursive-descent parser, multi-pass semantic analysis, MIPS codegen, graph-coloring reg alloc.

2D/3D Spatial Experience Editor [Link to Project](#)

- 2D CAD plan sketching and 3D spatial sketching, parametric rooms, openings, objects and materials, procedural geometry, GLB assets, guided camera tours, real-time visitor preview, JSON serialization; TypeScript, Svelte 5, Three.js, Threlte, SVG, WebGL.

LEADERSHIP & EXTRACURRICULARS

McGill Vietnamese Student Association

Vice President of External Affairs

- Manage inter-club collaborations and partnerships, representing the organization to university administration and at campus-wide events with 100+ attendees.

McGill BOLT-19 Hackathon

3rd Place (15 competing teams)

- Secured 3rd place by developing a retail intelligence platform that scraped data from multiple e-commerce websites and performed competitive analysis to deliver market insights using Python and Scrapy.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C/C++, JavaScript, TypeScript
- **Front End:** React, Svelte, HTML, CSS, Tailwind CSS
- **Back End:** Node.js, FastAPI, Flask, REST APIs, SQLAlchemy, Celery, WebSockets
- **Cloud & DevOps:** AWS, Docker, GitHub Actions, Git, Unix/Linux
- **Data:** PostgreSQL, Redis/Valkey
- **Testing:** Pytest, Vitest, JUnit
- **AI Development Tools:** Cursor, Codex, Claude Code
- **Languages:** Vietnamese (native), English (fluent), French (intermediate)
- **Interests:** Cilantro, classical music, literature
